EDUCATION

Master of Computer Science *Jan./2025 - Now*
Northeastern University(vancouver)

- Average Score: 4.0/4.0
- Relevant Coursework: Full Stack Web Development, Advanced Data Structures and Algorithms, Software Design.
- Built a rigorous foundation in CS fundamentals with a focus on software engineering principles.
- Deepened expertise in Computer Systems by analyzing CPU/memory interactions and concurrency models, studying High-Performance Log Recovery System

Bachelor of Economics in International Economics and Trade *Sept./2020 - Jun./2024*
Beijing International Studies University, Beijing

- University Special Scholarship (Oct./2021), *Beijing International Studies University*
- The Special Prize of the Video Group in the National College Students Red Tourism Planning Competition, Ministry of Culture and Tourism of the People's Republic of China (May/2021)

SKILLS

- Business Systems: Salesforce (CRM) workflows, Technical Case Management, Power BI (Data Visualization).
- Tools: Microsoft Office 365, Salesforce, JIRA, UTM Virtual Machines.
- Programming Languages:JavaScript (ES6+), HTML5, CSS3, JUnit, Selenium, Jest, SQL, Java, C++, Python
- ML Frameworks: PyTorch, Scikit-learn, Surprise, Git, Docker, Agile Methodologies.
- Software & Tools: Microsoft Excel, PowerPoint, Adobe Creative Cloud (AE, PR, FCP)
- Fluent in English both written and oral communication (TOEFL: 100) , Mandarin (Native)

INTERNSHIP EXPERIENCE

Project Assistant at a Consulting Firm (Paid) *Oct./2023 – Dec./2023*
Huaxia Zhongcai (Beijing) Accounting Firm, Beijing

- Conducted customer enterprise information collection, analysis, and processing, to provide support for the optimization plans.
- Communicated with managers of Party A about the organizational structure of the company, and gave professional suggestions on optimizing the company process.
- Applied Visual to draw company optimization flow charts for customers.

PROJECTS

Full-Stack Content Engagement Platform *Sept./2025 – Now*

- Developed a personalized recommendation engine using the MovieLens dataset from Kaggle, implementing Collaborative Filtering and Matrix Factorization techniques.
- Integrated my background in multimedia content creation with back-end engineering to build a dedicated web platform for a Bilibili channel with 1,300+ subscribers.
- Developed a robust client-server architecture using Java and RESTful APIs, applying Meta's back-end development principles to ensure seamless data flow.
- Leveraged Git for version control and utilized Cursor/Claude Code to optimize code efficiency and documentation.

Movie Recommendation System | Python, Scikit-learn, Pandas | *Sept./2025 – Now*

- Developed a personalized recommendation engine using the MovieLens dataset, implementing Collaborative Filtering and Matrix Factorization to handle large-scale sparse matrices.
- Quality Assurance & Testing: Conducted rigorous model evaluation using RMSE and Precision@K metrics; implemented unit tests for data preprocessing pipelines to ensure data integrity and prevent regression.

han.yi5@northeastern.edu

Dear SAP Hiring Team,

I am writing to express my enthusiastic interest in the Agile Test Developer Internship at SAP Vancouver, starting in May 2026. As a Master of Computer Science student at Northeastern University (Vancouver), I have developed a strong foundation in software engineering and automated testing. I am particularly drawn to SAP's commitment to building next-generation Analytics platforms and would welcome the opportunity to contribute to your team's success over the 8-month contract duration.

During my academic journey and various projects, I have honed the technical skills essential for this role:

Full-Stack Proficiency: I possess solid programming skills in JavaScript and Java. My experience includes building web applications using HTML/CSS and modern frameworks, ensuring seamless integration between front-end interfaces and back-end logic.

Quality Engineering & Automation: I am well-versed in designing and executing test scenarios. My background in algorithms and data structures allows me to write efficient, robust code for unit testing and end-to-end automation frameworks.

Agile Mindset: I thrive in collaborative environments. I am familiar with the Agile lifecycle, including Sprint planning and estimating user stories, and I am eager to apply Test-Driven Development (TDD) principles to maintain high code quality in a CI/CD environment.

What excites me most about joining SAP is the opportunity to work on the cutting edge of Cloud and Big Data technologies. My recent focus on Machine Learning and data analysis at Northeastern has prepared me to assess complex technical environments and migrate tools to keep pace with rapid industry changes. I am a self-motivated problem solver who enjoys working both independently and as part of a cross-functional team.

I can confirm my availability for a full-time, 8-month internship starting May 2026. Attached please find my resume and unofficial transcript for your review. Thank you for your time and consideration. I look forward to the possibility of discussing how my background in computer science and passion for quality-driven development can benefit the SAP iXp program.

Sincerely,

Yi Han
